

RASHA FAHEEM

Full-Stack Developer • CRM Integrations & AI

Lahore, Pakistan • +92 315-4741516 • fahimrsha3@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer (MERN) with 1+ year of professional experience shipping production web apps and CRM integrations at MergeStack. Specialized in HubSpot Private App API development, Salesforce-to-HubSpot migrations, and AI-powered features (OpenAI RAG, semantic search). Comfortable across the stack — React, Next.js, TypeScript, Node.js, MongoDB/PostgreSQL — with proven delivery of webhook automations, real-time data pipelines, and headless CMS builds on Builder.io. Computer Science graduate (CGPA 3.63/4.0).

EXPERIENCE

Associate Software Engineer • MergeStack

Oct 2025 – Present

- Lead Salesforce-to-HubSpot CRM migrations — mapping custom objects, deduplicating records, and validating post-migration data integrity across contact and deal pipelines.
- Maintain and extend HubSpot Private App APIs, building custom webhook integrations and automating lead-lifecycle workflows with the HubSpot Node.js SDK.
- Design Airtable automation workflows using multi-step scripts and conditional logic to eliminate manual data entry across internal ops teams.
- Develop and maintain marketing pages and landing components in Next.js and Builder.io CMS, supporting growth and demand-gen campaigns.

MERN Stack Intern • MergeStack

Jun 2025 – Oct 2025

- Built responsive UI components with Next.js, React Query, Jotai, and React Hook Form (Yup validation) and shipped them to production within the first month.
- Developed a Supabase-powered backend (Auth + Database modules) for an internal engineering tool.
- Built an AI RAG chatbot with the OpenAI API, enabling semantic search over internal documentation.

Software Engineer Fellow (Remote) • Dev Weekends

Jun 2025 – Present

- Selected for an intensive full-stack MERN fellowship; building end-to-end projects from spec to deployment (3 shipped to date).
- Collaborate in cross-functional peer teams to debug production issues and conduct code reviews.

PROJECTS

AI-Based Blood Donation Management System (Final Year Project) *React Native • Flask • MongoDB • scikit-learn*

- Architected and built a cross-platform mobile app connecting blood donors and recipients across 3 Pakistani cities.
- Trained two ML models (Random Forest + Logistic Regression) achieving 87%+ accuracy on donor-recipient compatibility matching and donation-likelihood prediction.
- Integrated an ML inference layer into the Flask API, reducing manual coordinator effort and enabling real-time decision support.

MERN Authentication System with OTP Verification *Node.js • Express • MongoDB • JWT • Nodemailer*

- Built a production-ready auth system with email-OTP verification, JWT session management, and secure cookie handling.
- Deployed the backend on Vercel (serverless) and frontend on Netlify with environment-separated configs.

Real Estate Listing Platform *MERN • Cloudinary*

- Developed listing creation with multi-image upload (6-image cap, 2 MB limit) via the Cloudinary SDK, with client-side preview and deletion.
- Optimized MongoDB aggregation queries to cut listing load time and built a responsive React frontend with filter/search.

Discord URL Shortener Bot *Node.js • MongoDB • Discord.js*

- Built a bot that intercepts long URLs in chat, generates short IDs stored in MongoDB, and auto-replies with shortened links — reducing message clutter for 200+ server members.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend: React.js, Next.js, Redux, Jotai, React Query, React Hook Form, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Supabase, OpenAI API

Databases: MongoDB, Mongoose, PostgreSQL (Supabase)

CRM & Integrations: HubSpot (Private App APIs, Workflows, CRM), Salesforce, Airtable Automations, Builder.io

Data / ML: NumPy, Pandas, scikit-learn (Random Forest, Logistic Regression), TensorFlow, PyTorch

Tools & Platforms: Git & GitHub, Vercel, Netlify, Railway, Figma, Postman, Insomnia, Cloudinary, Expo

EDUCATION

B.S. in Computer Science • University of Education, Township, Lahore

Jun 2021 – Jun 2025

CGPA: 3.63 / 4.0
